DETAILED ACTION

Drawings

1. Paper no. 5, dated January 11, 2002, noted that figures 5A, 5B and 6 should be designated as - - Prior Art - -. The applicant acknowledged that in the reply received on April 16, 2002 and marked-up drawings were submitted. The next set of drawings received by the office from the applicant, dated August 22, 2003 did not reflect these changes. In order to avoid abandonment of this application, formal drawings reflecting the accepted changes is required in reply to the Office action. The correction will not be held in abeyance.

Allowable Subject Matter

2. Claims 1-20 are allowed.

3. The following is an examiner's statement of reasons for allowance. The prior art of record and to the examiner's knowledge does not teach or render obvious, at least to the skilled artisan, the instant invention regarding:

a recess in a carrier substrate wherein the recess has a soldering land within the recess, which entirely covers the recess surface except for a passage/slit, as recited in independent claims 1, 8, 12 and 16. The applicant's invention allows for better wettability of the solder to the recess within the carrier substrate (i.e. chip), as the passage/slit within the solder land allows for air/gases to escape during attachment.

3A. The following references are cited as being particularly relevant to the applicant's invention:

Hembree et al. (6,037,667) teach socket assemblies in figures 4A, 4B and 4C. With particular emphasis on figure 4B, the socket structure has an opening (i.e. passage or slit) by which gases could escape during attachment. However, the socket assembly of Hembree et al. is not recessed into the substrate as recited by the applicant's independent claims.

Abe (6,028,366) teaches a recessed solder land within a package substrate that has flux escape channels as seen in figure 3A. However, Abe does not teach a circumferential wall within the soldering land as recited in applicant's independent claims, wherein the applicant's claims recite the passage/slit being defined within the wall of material that is in the solder land recess.

3B. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
